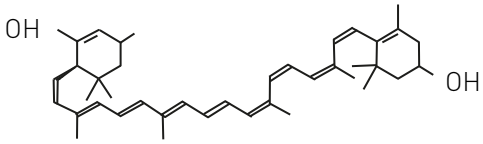
LUTEIN
E161b

Plant-Ex Ingredients Ltd



Origin: Extracted from the flowers of the Marigold plant Tagetes erecta.

Profile: Lutein provides a warm, lemon yellow colour at lower dosages with a more orange hue at higherdosages.

Formats: Available in both oil and water-soluble liquid formats, as well as water soluble, spray dried powder.

Stability: It has good stability to heat and light, with a pH range of 3 – 8.

Applications:

Functional foods
Biscuits
Beverages (Tropical especially)
Sugar Confectionery
Sauces
Cheese

Technical Support
Talk to our team about the options available and our recommendations which would be given according to the application. Accelerated stability testing can also be undertaken in our laboratories to assist our partners.
